

Hire Products

- » Need a compliant barrier or crash cushion for lane or road closures?
- » Don't want the expense of having to invest in a product you possibly won't use again?

» Why not consider hiring?

CSP Pacific has the following products available for hire to suit all temporary barrier requirements:

TL-1 Plastic Barrier - a water filled barrier for 50kph zones

- » A 100% polyethylene water-filled barrier unit which are joined together using a steel connector
- » Provides positive work-zone protection to temporary construction sites & other miscellaneous activities
- » Can be used in many situations from protecting the public surrounding a construction site to work-zone safety on 50kph roads - Test Level 1 (TL-1)
- » 180 lineal metres can be delivered on one truck, saving on transport costs
- » SLED End Treatment is a free standing 'special' end unit that can be fitted to the barrier in a tangent position if required. If this end treatment is not used the barrier will need to be flared

ArmorZone™ TL-2 Barrier and End Treatment

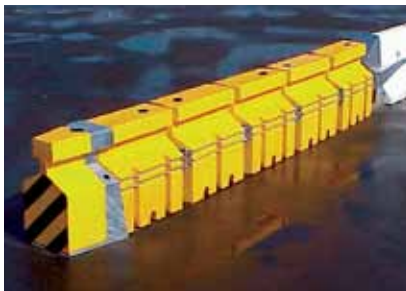

- a water filled barrier for 70kph zones

- » A durable plastic water-filled, side protective, crash barrier system
- » Can be used in many situations from protecting the public surrounding a construction site to work-zone safety on 70kph roads - Test Level 2 (TL-2)
- » Is simple and easy to install with no special installation requirements
- » The ArmorZone™ End Treatment is a free standing 'special' end unit that can be fitted to the barrier in a tangent position

BarrierGuard 800 - a light weight steel barrier for 100kph zones

- » A new generation temporary/permanent barrier system that is approved to NCHRP 350 TL-3 & 4
- » The steel sections weigh 90kgs/metre - 144 lineal metres of barrier can be delivered on one truck, saving on transport costs
- » The lighter weight of the 12m lengths makes installation, quicker, safer and far less labour intensive

ABSORB 350™ Crash Cushion - approved for TL-2 and 3

- » A water-filled, non-re-directive, gating crash cushion
- » Is approved for NCHRP 350 TL-2 and 3
- » It can attach to portable, permanent and moveable concrete and steel barrier

Portable Safety Fence and Barricade

- » Portable Barricade system with concrete filled or plastic swivel feet
- » It is a portable light-weight barricade that can be used in situations where a compliant barricade is required. Uses can include:
 - » Crowd control barricade
 - » Pedestrian barricade
 - » Traffic barricade
 - » Safety fence
