

Road Rave

the first of many ...

Welcome to the first edition of **Road Rave**. We will be putting **Road Rave** together every two months to keep you up to speed with what's going on around the place. We've got a lot to tell you about ... we have a number of new products and we also have a new team focused on bringing you innovative ideas for the roadside.

We have had some issues over the past few months, but we have now sorted these out and we sincerely appreciate your continued support.

new CSP website

We are in the process of re-creating our website. Our aim is to create a site that will provide a 'one stop information spot' for news and information on anything to do with roadside infrastructure and safety products. We expect to have it up and running before Christmas. It will contain a library of all our CAD drawings that you can view and download, design information on our products, videos on crash tests of our products and plenty more. We'll keep you posted on progress...

Massbloc™

Massbloc™ is a new product for CSP. It is an innovative retaining wall solution which saves on installation time when compared to traditional gabions. The blocks are made of permeable concrete and can be easily lifted into place with a hiab. The permeable concrete construction of **Massbloc™** can remove the need for scoria or gravel backfill behind the wall and simplify construction.

Massbloc™ can be used for many types of retaining wall and can be used in conjunction with Geosynthetic reinforcement. **Massbloc™** can also be used with CSP's Multiplate structures, for stream bank rehabilitation and even artificial reefs ... basically anywhere a gabion has been used in the past.

The benefit of using **Massbloc™** is a substantial saving on installation time.

If you would like further information on Massbloc™ or help designing a retaining wall using Massbloc™, contact your local Sales Engineer:

Richard Beale in Auckland - 09 6341239
Joe Habets in Hamilton - 07 876 1019
Julian Chisnall in Wellington - 04 560 3241
Nick Cox in Christchurch - 03 341 0917

safety features workshops

Transit NZ is holding its Highway Safety Features Workshops in October and CSP is very proud to be sponsoring them. Based on last year's workshops, they are extremely useful for consulting engineers, asset managers and contractors with responsibility for design, installation and repair of roadside safety features. We expect that the workshop will generate some very interesting discussion and we would strongly encourage you and your team to attend.

Dates are:
Auckland 11-12 Oct
Wellington 18-19 Oct
Christchurch 23-24 Oct

Registration forms or more information can be obtained from Carianne Messana-Tait of Transit NZ on ph 04 496 6617 or Peter Martin of CSP on **0800 655 200**.
